CITY ORDINANCES.

We learn that the Revised ordinances of Cedar city, are is the hands of the Judiciary committee, where they have been for some time, but that there is a prospect of their soon being through with them, after which the changes are plained the object of the meeting, that the council will lose no time in putting them into operation. The need of something being done in this direction is apparent to every one who takes the trouble to notice the manner in which the water in the culinary ditches has been polluted during the past two months.

Of late there has been a general impression that the law was not to be enforced, and the result is that no regard is paid by many people as to what but a resolution was presented, and ditch they use for the watering of and with unanimous consent adopted, their animals. In fact there are those in our town who do not believe that the indiscriminate watering of animals at the ditches, and the consequent befouling thereof, is any menace to the health of the community.

The Editor of the Richfield Resper's name appears in a recent number of that paper among the members of the Richfield Theatre Co, How that chap manages to publish the largest and best country weekly in the state, and find time to monkey with theatricals, passes our comprehen-sion. It is no doubt another illustration of the unequal way in which capacity is dole out to us mortals. If he does as well on the stage as he does in the editoral chair, all we can may is that it is not fair.

The town of Price Emery Co. is mov ing for water works, and the committee on that subject after suggesting to the Town Board several sources of rev enue to meet the expense, closed their report as follows, "An increase of revenne could be acquired by a reduction of salaries of the president and members of the board, or by resolution to turn into the treasury the amount of their compensation." The Eastern Utah Advocate does not record the result of this audacious suggestion, but one of two things is probable, either the Town board is composed of old fogies and kidney trouble follow quickly. In pneumonia, This has been fully proven and kidney trouble follow quickly. In pneumonia, This has been fully proven the times when Brigham Young was you to health. It strengthens, builds this remedy has been used during the on deck, or they rose in their wrath up and invigorates rundown systems. and smote that committee "Hip and J. H. McDonald Druggist. thigh from the rising of the sun until the going down thereof." A president and Town board work without salaries in this the 20th century! Perish the thought.

The Richfield Reaper is authority for the statement that "During the two years that the sheep have been kept out of the country grass, weeds and shrubbery have again made an excellent start, and it would be only a few years until the hills would again be covered with a good stand of vegetation." This account refers specially to the results of the setting saide of the Fish Lake Reserve, and the keeping of the sheep off that patch of earth. There can no longer be any doubt that sheep are not suitable animals to be allowed to graze on the water sheds of the arid region, and in dividing up the range among the cattle and sheep, this ought to be borne in mind. Sheep not only ant the grass, but they also destroy the nudergrowth which is indespensible to the successful holding back of the water till late enough in the season to be of the most value to the farmer.

THE Pine Valley correspondent of the Dixie Advocate says a couple of sheepherders who are in the employ of Mr. Hatch of Panguitch, draw their guns on some of the Pine Valley people who were approaching them unarmed to remonstrate with them on their invasion of the Pine Valley Range. The writer adds that the Garfield county people are invading their range with tens of thousands of sheep, and depriying the cattlemen of the only range that is left for their stock. It is just such behavior as is alleged by the Advocate Correspondent, that causes out breaks like the one that recently took place in Wyoming about thirty miles from Thermopolys, where a band of masked men raided the sheep camp of William Minnich, and shot him through the lungs, dynamited and slaughtered 300 head of sheep and burned the outfit wagons. It is a great pity that the sheep and cattle interesin men leaving their own ranges, cou-If men proceed to adjust these matters Kimberley and Buhl to pay up.

upon the principle of might makes Soully Record. right, such scenes as the one in Wyom ng are likely to be of frequent occur-

AN IMPORTANT MOVE.

Citizens of Cedar Meet in Mass Meeting to take into Consideration the Best Means of Protecting their Water Shed from Damage from Stock.

Last Monday evening a mass Meeting of the citizens of this city met in the Tabernacle for the purpose of devising some means of protesting the water shed of Coal creek from the damage which is being done to it, by the pasturing of hards of cattle and sheep thereon,

Hon. John Parry was elected chairman and Joseph T. Wilkinson was chosen secretary. The chairman exstating that recent ruling of Judge Marshall of the U. S. circuit court, had defeated our hopes of getting the needed protection from the Forest Reserve remedy, and that some other means were imperative to avoid the waste and the befouling of our water supply. The need of some measure being taken with this and in view was too apparent to require debate and therefor no time was spent in that line, to the effect that we petition the congress of the United States, to code to to the water owners of Coal creek the water shed of that stream and its tributaries; and if this concession cannot be obtained, that we ask that the said water shed be set aside as a Forest reserve, and that Cedar city be given control thereof. A committee of three consisting of Chairman Parry, William Houchen and Danial S. Macfarlane, were chosen to formulate the petition, make a map or otherwise describe the country wanted, and forward them to our representative in congress as soon as possible.

The scratch of a pin may cause the loss of a limb or even death when blood poisoning results from the injury. All danger of this may be avoided, however, by promptly applying Chamberlain's Pain Balm. It is an antispection and quick healing liniment for cuts, bruises and burns

A Most Fatal Gift. Would be the power of foreseeing events. This would destroy hope. A knowledge of the future would unmake happiness. There are, of course, some things about the future we do know.

If, for instance, a lack of energy, ambition and loss of appetite shows itself we know it will be followed by serious complaints if not checked. Often Liver

Cattle Man Unite.

A number of the prominent cattlemen of Washington and Kane counties met recently in Kasab, and organized "The Washington-Kane County cattlemen's Union," with Alexander Findlay as President, B. F. Saunders Vice Aresident, and H. H. Harder for Secretary and Treasurer. In addition to these officers an executive committee consiting of Eph Mansfield, Brigham Riggs, James Andrus and C. F. Foster was selected. The membership fee is one dollar, and 42 members are already enrolled. The object of the association is to promote union among the cattlemen, and protect their stock from thieves, and the ranges from sheep, wild horses, any other factors inimical to their interests. A purse of \$500. was offered for the conviction of any person who steals cattle belong to any member of the Union.

We are in receipt of a letter from our friend Randle L. Jones, of this city, who is at present laboring in the Eastern States mission at the head quarters of the church in that place. Elder Jones seems to be quite contented with his lot and remarks in passing, that owing to the fact that he frequently sees people from our section, he is kept from getting home sick, and that it seems but a short time since he was with us. He was visited by Elder Samuel W. Leigh as he passad through that part of the country on his way to Europe. Brother Jones informs us that he is not cut out for a public speaker; but if he speaks as well as he writes his hearers ought not to complain. He evidently has his eyes open to, and takes note of that which is transpiring in his neighborhood. He speaks in terms of praise of the president of the mission, Elder John G. McQuarrie of St. George, with whom he feels that it has been a privilege to be associated. Elder Jones has no special admiration for some of the things that come under his observation, among which may be mentionts cannot be reconciled on the principle | ed the atmosphere of Pittsburgh where of fairness. There can be no justice he says it is necessary to change ones collars and snirt, every time he comes nties and even states, and seeking to in off the street on account, we suppose, destroy the parts of the public domain of the presence of the smoke from the that other people have made valuable Iron manufacturies. What a fate we by their presence and improvements, have escaped through the failure of

demonstrated that pneumonia, one of the most dangerous diseases that medical men have to contend with, can be prevented by the use of Chamberlain's Cough Remedy. Pneumonia always results from a cold or from an attack of influenza (grip), and it has been observed that this remedy counterests any tendency of these diseases Award great prevelence of colds and grip in years, and can be relie with implicit confidence. Pneumonia often results from a sligt cold when no danger is apprehended until it is suddenly discovered that there is fever and difficulty in breathing and pains in the chest, then it is announced that the patient has pneumonia. Be on the safe side and take Chamberlain's Cough Remedy as soon as the cold is contracted. It always cures.
